I first want to thank everyone who was able to attend the meetings that Jennifer arranged on Friday and to thank Jennifer and Elizabeth for their continued amazing work, and the work of Student Life and Academic teams, as we face so many challenges and issues. It was heartening to see so many who want to be part of the conversation as to how we can be better, heartening but not surprising :)

I have attached a document that was sent to Contra Costa Health with information about summer school programming that Kimber did a remarkable job with and that I added info on related to protocols for safety of both students and employees that address CC health guidelines as well as CDC guidelines. They approved our protocols and all summer offerings. [REDACTED]

I just want everyone to be aware of what is happening at school this summer and how we are focusing on specific protocols in advance of fall.

Caitlin and I will also be in a meeting this Thursday with CC Health to discuss scenarios and needs for school re-opening in Contra Costa County at this point in time, and I emphasize "at this point in time" as we know there will be major changes in guidelines as we move forward.

Finally, Contra Costa Health sent us messaging encouraging everyone who lives in Contra Costa to be tested for Covid monthly. They have ramped up testing and want to get real data on the spread and occurrence of the virus. We will actually send out to families but wanted all of you who live in the county to know. You can set an appointment using this number:
844-421-0804

Have a wonderful weekend/week ahead all.
Kevin
